

ABOUT US

Well Bilt Industries has been a leader in the Hangar Door and Operator industry for over twenty five years. Well Bilt Industries has grown over the years from a one product company, exclusive to the Airport Hangar market, to a multi-product company now including the Marina, Industrial and Storage Warehouse markets. Offering a variety of custom steel door designs and operator models, all manufactured at our facility in Williston, Florida.

Mike Bilt, the company's founder and product developer, was a pilot for over forty years. Channeling his mechanical and electrical background with his experience as a FBO owner in South Florida, he was able to combine his passion and knowledge by manufacturing the quality of product he was in search for himself.

After Mr. Bilt's sudden death in 2000, the company entered into the new millennium headed up by his daughter, Carol Bilt. Proud to carry on her father's vision, Carol immediately went to work with key staff members and engineering consultants eager to expand the existing product line and update current product standards.

Our Truck - Off To Make Another Delivery!

Well Bilt Industries is dedicated to maintaining their superior quality of design, engineering and overall product integrity. Many design features exclusive to Well Bilt Industries were awarded **U.S. Patents**. Well Bilt Industries has also qualified and obtained **UL-Listing** for many of their products. Adding to the company's **U.S. Patents** and **UL-Listing**, Well Bilt Industries has received a **Miami-Dade County Certificate of Competency as a Hangar Door Manufacturer**.

Experienced working directly with architects, engineers, general contractors and building manufacturers, Well Bilt Industries can assist with your project's custom door requirements. Whether your project calls for a Bi-Fold Door System, a Rolling Door System, a Hydra-Eze Hydraulic Door System or a Hercul-Eze Door Operator, the entire staff at Well Bilt Industries is always available.

We look forward to the opportunity to design and manufacture a custom steel door system best suited for your facility.
